Education

State University June. 2018 – July. 2022
Bachelor of Engineering in Computer Science *Chikodi, Karnataka*

Projects

ATM Simulator System | *Mysql, Java swing framework, Eclipse.* January 2024
- The ATM Simulator System provides an interactive platform for users to simulate their banking transactions in a controlled environment. Leveraging Java and the Swing GUI library, this system demonstrates the flow of a real ATM application, allowing users to create accounts, manage transactions, and more
- This project is developed to nurture the needs of a user in a banking sector by embedding all the tasks of transactions taking place in a bank. Future version of this project will still be much enhanced than the current version.

Barber Saloon Website | *HTML, CSS, Java Script, Visual Studio.* December 2023
- A barbershop website isn't just for appointment settings and price information, it's your space on the internet to showcase your saloon, and the dedicated hairstyling professionals who work there. A well-crafted about us page allows you to establish your brand and connect with customers on a personal level.

Movie Info App | *—HTML,CSS, JavaScript,TMDB API, Bootstrap,Netlify* November 2023
- Users can search for extensive movie information, including titles, release dates, posters, overviews, and trailers via.
- The platform responsive design and continuous result loading provide a user-friendly experience.
